Higher National Certificate - HNC Validation Process - Success

### Orthotic Education & Training Trust (OETT) NEWS

The OETT continues to provide financial support to many UK based Orthotists who are undertaking postgraduate education and/or participating in short courses. The Trustees are currently taking a particular interest in the training of new graduates in their first year as Orthotists. The OETT is planning a meeting to bring together the employers of new graduates (both commercial companies and NHS) to identify good practices in supporting Orthotists through this fledgling stage. We also want to involve Orthotists who have recently transitioned through their first year and would like to contribute reflections on your experience. If you would like to be involved in the meeting please send your contact details to [morag@bapo.com](mailto:morag@bapo.com)

NHS Education South Central : This is a FREE opportunity for NHS Allied Healthcare Professionals and Healthcare Scientists to take part in a short course on evidence based practice. The course is held over 5 weeks with 5 face-to-face contact days supported by online learning throughout the course.
